

Brabantia

Brabantia manufactures practical solutions for the home, from waste management and laundry care to food and bathroom accessories.

The organisation operates from a 56,000 sqft factory and due to the high intensity of power being used onsite, they contacted Solarsense to identify what savings could be attained by utilising solar.

The new system has dramatically reduced their overheads and the total net benefit projected over a 20 year period is in excess of £1.5 million.

Client: Brabantia
Sector: Industrial & Manufacturing
System Size: 250 kWp

Estimated Annual Output: 280,500 kWh
Annual CO2 Emissions Offset: 148 tonnes
