

“ We have been impressed by Solarsense’s attention to detail from the very first enquiry. At all stages you delivered as you promised - safely, cleanly, on time and with no surprises in cost.

A C Emery, Eco Congregation Coordinator

Nailsea Methodist Church

North Somerset, South West UK

Technology: Solar PV
System size: 45.38kWp
Annual Output: 39,804kWh
Annual CO2 savings: 23,883kg

As part of its stewardship of the earth’s resources and from a deep concern for those whose livelihood is threatened by changes in the earth’s climate, Nailsea Methodist Church installed 40 solar panels on its west facing church roof in December 2011.

The Church was awarded Eco Congregation status in February 2011 and 2014.

They later returned to Solarsense in 2018 to have another system fitted and further improve their carbon footprint.
