

“ Not only will this benefit the environment, it will also save the local taxpayers money which can be used to support essential frontline services.

David Bellotti, Council's Cabinet Member for Community Resources

Keynsham Town Hall & Civic Centre

Keynsham, South West UK

Technology: Solar PV
System size: 243.94kWp
Annual Output: 230,130kWh
Annual CO2 savings: 125.19 tonnes

This installation for Bath and North East Somerset Council is one of the largest local authority owned single-site PV installations in the UK.

Solarsense worked closely with Willmott Dixon to design and install the 243kWp solar PV solution across a number of roofs.

The system was designed to power the new town hall and council building - saving more than £27,500 per year in energy bills alone.
